

POS-*T* VINCENT

The pushfeed that changes it all

POS-*T* Vincent delivers a clear, high-impact product presentation with a genuine wow factor on the shelf. Whether round or square, cans or bottles, and everything in between, Vincent ensures that all products remain clearly visible and easy to reach at all times. One single system fits almost every category and product size, from health and beauty and grocery products to confectionery.

The modular design, consisting of only a few components, allows for quick and easy installation. Vincent also stays flexible in day-to-day operations: planogram changes and repositioning can be implemented effortlessly, saving time and reducing costs.

Vincent combines efficient processes with outstanding flexibility – for greater shelf efficiency and a compelling presence at the point of sale.

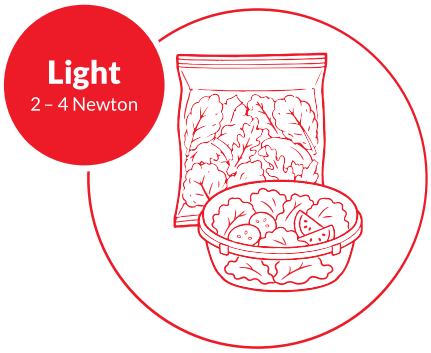
Your Benefits:

- **Universally applicable:**
  One system for all categories and product sizes
- **Easy planogram changes:**
  Simply adjustable in width
- **Time & cost savings:**
  Less effort for shelf maintenance
- **Perfect visibility:**
  Products always in the best line of sight
  and within easy reach
- **Durable & Stable:**
  Handles heavy or unusually shaped products with ease
- **Simple installation:**
  Fewer components

POS TUNING®
a Voßkenrich company

One system. Maximum versatility.

A single system for every product category. POS-T Vincent brings together the most diverse requirements in one comprehensive solution. Instead of relying on separate systems for individual categories, one consistent concept is all you need to manage your entire product range. This simplifies assortment changes and planogram updates, reduces maintenance efforts, and ensures optimum use of retail space – while delivering a consistent, professional presentation across all product areas.



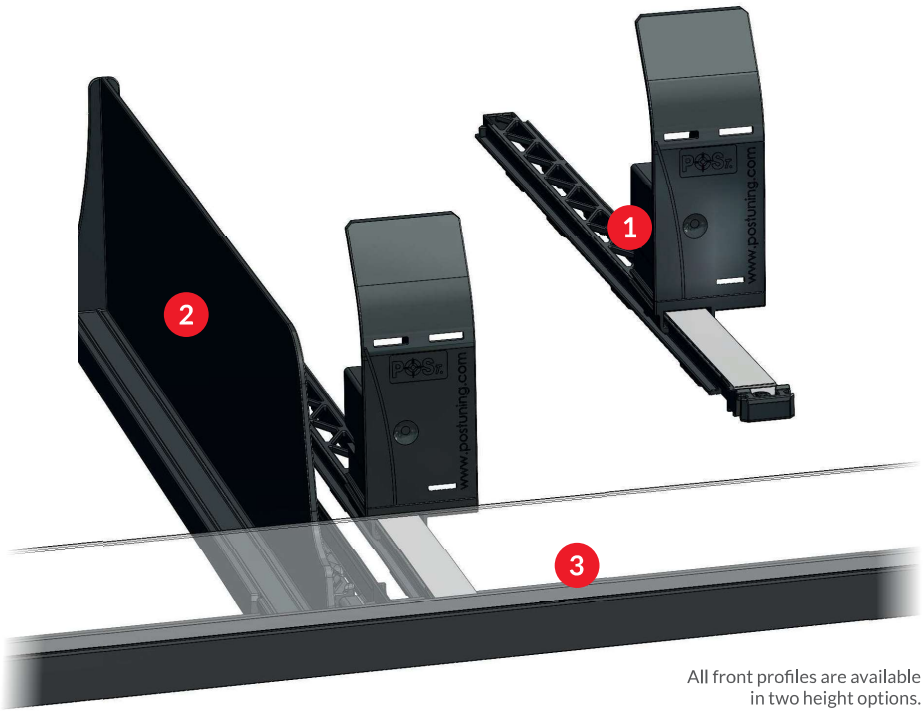
Less effort. More flexibility.

The modular design of POS-T Vincent opens up a wide range of possibilities for your product presentation. With just 3 components, planogram changes can be implemented quickly and easily.

The system can be installed on any standard retail shelf base and is suitable for product widths of up to 60mm. Even narrow products can be presented to their full potential – the system adapts effortlessly with just a few simple adjustments.

The Pushfeed unit integrates directly into the divider, ensuring an optimal presentation of products up to 40mm wide. The system is suitable for shelf depths from 360 to 500mm.

With its modern, understated design, POS-T Vincent blends seamlessly into any category, keeping the focus entirely on your products.



All front profiles are available in two height options.

POS-T VINCENT COMPONENTS

(per facing)

NARROW PRODUCTS

1. 1 x Pushfeed Unit
2. 1 x Divider
3. 1 x Front profile with front riser (per shelf)

POS-T Vincent Pushfeed Unit Light (bagged salads)

The POS-*T* Vincent Pushfeed Unit Light is the ideal solution for reliably pushing lightweight products to the shelf front. The pushfeed strength of **2–4 Newton** ensures smooth and gentle product guidance, guaranteeing an organised merchandise presentation and optimal visibility at the point of sale. Depending on the application, one or two pushfeed units are used per facing. This allows the pushfeed strength to be optimally matched to product weight and packaging shape. The Pushfeed Unit Light is particularly suited for lightweight products, such as **bagged salads**, and ensures reliable performance even with particularly light packaging.

POS-T Vincent Pushfeed Unit Medium (all product ranges)

The POS-*T* Vincent Pushfeed Unit Medium is the ideal solution for reliably pushing forward a wide range of products. The balanced pushfeed strength of **4–11 Newton** ensures smooth and consistent product guidance to the shelf front, guaranteeing an organised merchandise presentation and optimal visibility at the point of sale. Depending on the application, one or two pushfeed units are used per facing. This allows the pushfeed strength to be optimally matched to product weight and packaging shape. The Pushfeed Unit Medium is suitable for the majority of all **standard shelf applications** and stands out through its reliable performance in daily use.
